REN. Y WARD BEECHER

The experience of Henry Ward Decher in his of to triu ph over each assentts upon per sould character and reputation as were made when his ten weet ago, is without a saralle in the history of the world. The original vertical forth in the fit Faul imposes was the results of the interpolation of the blank property of the world. The original vertical forth in the fit Faul imposes was the results of the interpolation of the blank property of the world. The original vertical forth in the fit Faul imposes was the results of the interpolation of the blank property of the world. The original vertical forth in the fit Faul imposes was the results of the interpolation of the congress which we find triedly sate that it is not to be fit in the fit faul i a never mose signally Musicated than It has butternut, boath, while oak, sleventh black cal opinions who at first for next empration, maules and ongram lables. The services for shade, box elder, white olm ask walnut maple The directions were plant closely was whin he had left upon national affairs. In Illimois results are shown by a statement of parameter which are new setting on many and another in a minute from the ground as followed distinct distinct and the state of the stat whose of life: The moople of the servence forthe years from new 12 inches, hoft maple St 1.16 spoops at all 4 arr meeters years setting 40 meles rid clus 8 wars from 3 and man, man of the most on seed 24 makes mate in havin this opportunity to a cand lear state of the most on secting up memory and man, and of the most on segments of the publiq men of last dr., who as the remarkhe flash Hopeius has said to an item of the telect of it is congress will be to creat the remarkhe flash Hopeius has said to an eventorest in the phanting and piecervation of trees first by agitation and see nd, by furnation, asthou and fungar by which he information is met exactly what the practical heighted, controlled and to say these dama to physical specification of the country is the advantages of tree project home for his philas for 5, for the furnish a brief and pixetical treature on how

The issumment people to follow the ther hal ther, it ought to reep a watch on, and expose The set prove as people we real on use men may then set prove the reachly practices of nursery men who may strong. A senseriable instance of sufering along the set of devia ing from them is been conducted and rob the proper of the second by the Sen Qriesus Times Oceanorat, issued by the Sen Qriesus Times Oceanorat, instance between the stand of source other and the stand of source of the second control of their sounce. Lectures the second control of their sounce to the second district; of their sounce to the property of the second district; of their sounce to the second district of their sounce. Quincy, Plan, at 1874, every one has died.

CONSIDERING THE TREES.

Public interest in forestry has grown greatly four fast-disappearing forests and the value of their influence a you dimate and the public health are coming to be generally understood. health are coming to be generally understood, was a crude step compared with the progress Early this mouth the American Forestry Com- which has been made within the meme y of gress met at St Pan its purpose being to urge many persons new hinch, The trained ply apon the causity the importance of recipianting and forest preservation. Exhaustive papers on a score or more questions relating to person a score or more questions relating to forestry or list value, were read, all of which the more particularly fortunate in learning what gross met at St Pau its purpose being to urgo with the print of in fail and apread broadcast over the country the looped that the wide over the country the looped that the wide orally isotopied by that undure is its own respected by that undure is its own respected by that undure is its own respectively and thus medicines are of value existly subtraction of creeks a species of inform

and preservation of creeks a species of inform

the vital forces while their matural processes of derstood that knowledge presented in this way made aveskell of writers to show the bac in will only reach the inquiring few while his a more medicals of to ther Goose so far frou more medicals of to the Goose so far frou the product sense. In this consideration resolutions were adopted arging upon scheel boards and educators throughout the country therm.

However that may be it is doubtless that that portance of making certain rudimentary in the fc towing I mes, which are good enough to struction in "orestry part of the public school have been written by the belowed Moters ex struction in "owner pass of the party of the party of the breath and the understood is said for the people to apply without their that the matter will be constantly agreed by the means added. the members of the cougress many of whom are themselves prom neat educate a On the study of forestry as an exportant

contributor to practical education Mr H G Joly of Quebec read an interes ing paper The alm of education he said should be to train up the Joung in such knowledge of forestry he con the Joung in such knowledge of forestry he con sidered as coming under that rule. When tim Ad scussion is going on in the deriocratic range as to the causes of Hancocks defeat should know dow to grow tamber—how to se-The New York Traces parefully sums n | the lect proper accoust and to utilize the ground to the best advantage. The planting of trees was good work for bony and mind, and for the heart as well. There were few schools where kast one tree eve y year. The children would be lead to ask quest.on: The child might die before the tree grew large, or go away and never see it again. But his work would not be lost If he d d rot profit by it others would bind him Poof Beniels of St Paul followed the prevailing ignorance upon the subject of futile and unresenable. The democrate axe raised this post mortem inquiry. Hanguck was by the enlist themselves so far as to know trees by entite themserves so tax as as a sum of the sight so as to be able to call them by their proper names, for the teachers has a rule were not bester informed in these matters than the not bester informed in these matters than the general public. The essayist went back to the olden time, when country ife was more promi-uent than city life, and when the children livthen city is and when the children living as they did in the main of forests were acquainted not only with the varieties and uses of good but on all when the adjustments and uses of good but on all when the adjustments and uses of good but on all when the adjustments and uses of good but on all when the adjustments and uses of good but on all when the adjustments and uses of good but on all when the continuous control is a supervisor of good in the control in the control is a supervisor of good in the control in the control is a supervisor of good in the con of wood, but o all mant and animal life. The
